

Dancing Wheels Company School
ART IN MOTION

WORDS FROM OUR PRESIDENT & FOUNDING ARTISTIC DIRECTOR

Dear Friends,

Welcome to The Dancing Wheels Company & School website. It is my pleasure to have this vehicle to share our Company's philosophy, unique artistic programs and achievements. I'd also like to introduce and thank the wonderful people who bring the organization to life, including our administrative team, our dancers and teachers, and our Board of Directors.

The combination of incredible talent and energy found throughout our entire team has made Dancing Wheels a doorway to full inclusion in the arts for all. We believe everyone has the right to participate, and the diversity of age, ethnicity, gender and physical ability in our Company proves that everyone can.

Our work for education, advocacy and inclusion keeps the momentum rolling toward our goal of being a distinguished center for integrated dance with worldwide reach. By living our mission, we've discovered new opportunities and partnerships that strengthen the Company & School. We have also gained many dear friends from within and beyond the arts world.

On the artistic front, our extensive body of work from distinguished choreographers continues to showcase diverse artistic choices through fresh concerts each year. With a large anthology of styles to choose from, our tours keep the wheels in motion with guest appearances and performances around the globe. Across concert halls and university stages, we've been welcomed by passionate and supportive audiences who deeply embrace the concept of integrated dance.

As we move toward our 30th anniversary and beyond, we will continue to work toward expanding the vision of integrated dance worldwide. And we invite you to join us in developing programs and partnerships that will enlighten your communities with this exciting new art form. Together, we can leave a lasting legacy of artistry, education and endless possibilities for all.

Warm regards,

Mary Verdi-Fletcher
President/Founding Artistic Director
